## Service and care for scissors

The handles of all Fiskars scissors are injection-moulded directly onto the blades. This makes them as hygienic as possible, because there are no cracks and gaps in which bacteria can accumulate. Our handles are made of impact-resistant plastic.

Change to Classic, ReNew, Functional Form, Fiskars x littala and Fiskars x Moomin product families are made of nickel-free blades that are precision-ground, and made of hardened Swedish Sandvik steel with a hardness of HRC 57. The tension between the blades can be easily adjusted.

### **MAINTENANCE**

Most of the handles on Fiskars Classic scissors are made of polybutylene terephthalate (PBT), a plastic that can be sterilised effectively using either gamma rays or an autoclave. If you use an autoclave, the temperature should not exceed 137 °C. It is a good idea to keep the blades sharp by regular use of a Fiskars Clip-Sharp™. Fiskars scissors made in Finland are dishwasher safe.

### **STORING**

Some Fiskars scissors are sold in a storage cover that makes sure no one catches their fingers or hands on the points if the scissors are lying around or are in a drawer. The cover also helps protect the scissors against damage, and keeps them sharp longer.

Fiskars has championed the ageless principles of high quality, intuitive and sustainable design since 1649. We empower every enthusiast to follow their passions and create the life they want. We believe that making our daily activities enjoyable, inspiring and sustainable builds happiness and wellbeing that extends beyond our homes – to our families, our friends, our communities, and our planet.
